1. The loop, given below, will iterate_____ times. For (int counter = 1; counter < 10; counter = counter +1)
 - a. 0
 - b. 9
 - c. 110
 - d. 10
2. Which of the following is the first step in FOR loop?
 - a. Continuation condition
 - b. Incrementing condition
 - c. Initialization condition
 - d. Termination condition
3. Which of the following structure is correct for WHILE loop?
 - a. While (start; condition; end)
 - b. While (condition)
 - c. While (start; condition)
 - d. While (condition; end)
4. Which of the following is true about the switch statement?
 - a. It cannot handle the compound conditions which use logical operators.
 - b. It works efficiently on compound conditions which use logical operators.
 - c. It is valid for the large programs only.
 - d. It is valid for the small programs only.
5. If a function does not return anything, its return type will be _____.
 - a. Zero
 - b. Null
 - c. Void
 - d. Return 0
